LEARNING OBJECTIVES:

By the end of this workshop, participants will be able to:

- Apply surgical safety protocols including the WHO Surgical Safety Checklist in a structured and consistent manner.
- Respond effectively to critical intraoperative events such as anaphylaxis, cardiac arrest, and power failure using Crisis Resource Management (CRM) principles.
- Demonstrate safe practices in drug labelling, storage, and administration to prevent medication-related errors in the OT.
- Coordinate and communicate effectively using tools like SBAR during handoffs and intraoperative huddles.
- Identify and mitigate latent safety threats in the OT environment through structured simulation and debriefing.
